

DB Source – Clinics

Count: 55,124

39% Male 100% Zip + 4 100% Phones 27% Fax Numbers

Our DB Source database is multi-sourced using yellow pages and business white pages, along with annual reports, government data, business directories, corporate and executive registers and public records. In order to ensure accuracy, the file is then put through a telephone verification process to update and obtain additional information such as employee size, key contact name and primary SIC code.

The fact is that well-sourced, intelligently selected business lists and demographically rich databases are the most powerful tools for selling products and services in today's complex business environment. Reaching the right person with the right message is everything. Hugo Dunhill's DB Source database can do just that for you. We can help you locate new markets, identify new opportunities and build existing relationships.

Clinics are health centers that provide medical care to patients in an outpatient, non hospital setting. Clinics often specialize in one area of treatment such as women's health, family planning, kidney and dialysis, rehabilitation, substance abuse and mental health. Some clinics are federally or privately funded and provide treatment to the general public or the uninsured at reduced fees or for free.

Clinics perform a wide array of treatment to patients from checkups and immunizations to specialty treatment and outpatient surgeries. Clinics have state of the art medical equipment and are staffed with doctors, nurses, and counselors.

Reach these Clinics for offers on Seminars, Subscriptions, Books, Recruitment and any other health related offer.

The DB Source - Clinics list is NCOA'd quarterly.
