This file consists of Cancer programs and Specialists.

Many medical facilities have developed comprehensive cancer diagnostic and treatment programs. These programs are designed to have multidisciplinary teams working together to rapidly bring new prevention, detection and treatment discoveries to cancer patients. Physicians who treat cancer patients do so with medicine/chemotherapy, biopsy, staging, surgical resection of tumors and therapeutic radiation. Constant scientific breakthrough demands these professionals continuously hone and update their skills through research and seminar attendance, making these professionals ideal prospects for medical seminars and training programs as well as high-ticket vacation and luxury offers. Along with medical professionals that deal with cancer patients, there are many support programs for the patient and their families, such as the American Cancer Society.

Over half the cancer programs contain a director's name.

Reach Cancer Specialists for offers on Seminars, Subscriptions, Books, Recruitment and any other Cancer related offer.

The Cancer Programs & Specialists list is NCOA'd Quarterly.
